CyberHatch Incubator & Accelerator

FROM CONCEPT TO COMMERCIALIZATION, SAFELY AND SECURELY

The CyberHatch Incubator and Accelerator connects high-potential cybersecurity startups and growing companies to the resources and partners needed to succeed. Based in Fredericton, New Brunswick, a top Canadian destination for critical infrastructure organizations and talent, CyberHatch is part of a world-class industry cluster. We've got the infrastructure, R&D capacity, financial support, and visa sponsorship to fast-track your path to market, plus ecosystem mentorship from other startups and big brands like IBM and Siemens.

Fredericton, NB, Canada

SMALL CITY, BIG OPPORTUNITY

New Brunswick's capital city is a place where history and high-tech meet. Home to top universities, a booming tech sector, and a walkable downtown full of unique shops, galleries and restaurants, Fredericton mixes small-town friendliness with contemporary amenities.

Fredericton is also one of Canada's most livable cities, with tons of green space, the beautiful Saint John River, nearly 90 kilometres of hiking and biking trails, highly affordable housing, and an average commute of just 13 minutes.

New Brunswick by the Numbers

#1
Research & development sector in Canada*

#1
Digital infrastructure at the lowest cost

#1
Time zone in North America for global business
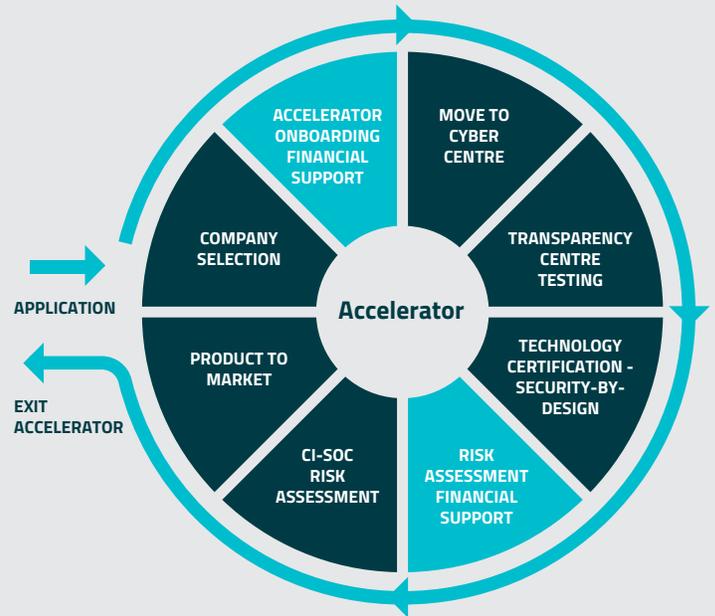

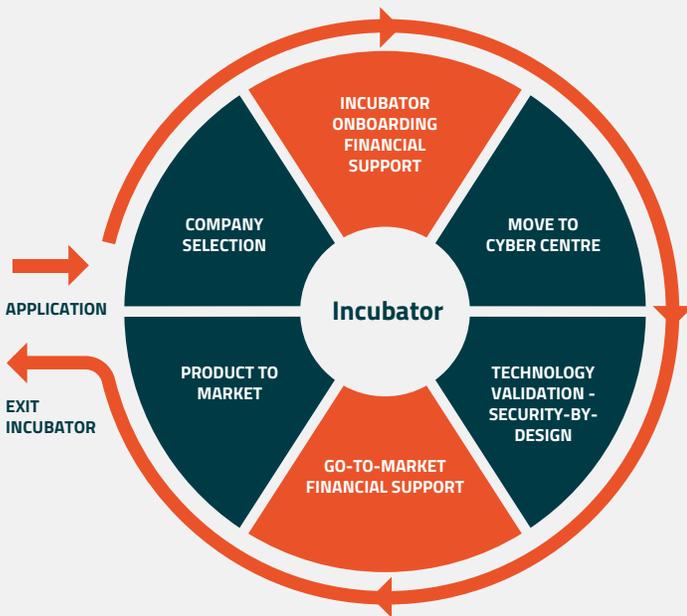

4 + 7
Universities + Training Colleges

$1 billion+
In technology exits since 2009

100 million+
Consumers within a two-hour flight

INCUBATOR

FAST-TRACK YOUR PATH TO MARKET

If you're the founder of a pre-revenue startup, the CyberHatch Incubator is for you. As part of a cohort of up to five early-stage companies, this premium program connects you to the mentorship, capital, workspace and contacts in government, industry and academia that you need to test, develop and commercialize your critical infrastructure product or service.

The CyberHatch Incubator allows you to:

- **LEARN** from experienced mentors
- **CO-LOCATE** at the Cyber Centre
- **RECEIVE** funding support on entry, exit
- **ACCESS** world-class infrastructure, technology
- **MEET** global business partners
- **TEST** and validate your product
- **VALIDATE** your solution is secure-by-design
- **GET VISA SPONSORSHIP** support from Planet Hatch

ACCELERATOR

SUPPORT TO SCALE FASTER

If your company is actively growing, the CyberHatch Accelerator can supercharge your scaling. Along with connecting to industry contacts and support to increase your lines of business and export opportunities through CIPnet, CyberNB's industry membership group, you'll be able to test and validate your technology and assess your cyber risk.

The CyberHatch Accelerator allows you to:

- **LEARN** from experienced mentors
- **CO-LOCATE** at the Cyber Centre
- **RECEIVE** entry, exit funding
- **TEST** and validate your product at the Transparency Centre
- **CERTIFY** your solution is secure-by-design
- **ASSESS** your risk with CI-SOC
- **GET** visa sponsorship support from Keiretsu
- **PITCH** Keiretsu global angel syndicate for $1-$10 million
- **VALIDATE** your solution is secure-by-design
- **GET VISA SPONSORSHIP** support from Planet Hatch

If you're an ambitious company founder who's ready to take your cybersecurity venture to the next level, apply to CyberHatch now or contact info@cybernb.ca for more information.

Space to Test, Connect and Grow

CyberHatch is based in the Cyber Centre, Canada's most advanced facility for cyber defence and critical infrastructure protection (CIP).

Located in the heart of Knowledge Park, Fredericton's Innovation District, it's close to over 60 university and private-sector research partners that are converting ideas into game-changing technologies.

CyberHatch knows that startups need all kinds of support, including financial. At entry, successful applicants get up to $180K towards co-location, mentorship, and technology validation. At exit, there is additional financial support from NBIF ($125K) and the chance to pitch Keiretsu Forum's Global Angel Syndicate for $1-$10 million.

The Cyber Centre is a high-security facility where business, government, and academia co-locate and collaborate.

Security features:

- Level 2 security capabilities location for national defence
- Canada's most advanced networking and data fiber infrastructure
- Redundant and diversified commercial power and data connectivity
- Onsite back-up generation
- Post-disaster building resilience
- Shared data center option
- Physical and electronic security layers 24/7/365
