

Attention Aerospace and Defense contractors!

Did you know that, starting now, all U.S. Department of Defense (DoD) contractors and suppliers worldwide will need Cybersecurity Maturity Model Certification (CMMC) in order to be awarded new contracts? And by 2025, every single DoD supplier will need to be CMMC compliant.

Get an edge over the competition by getting certified today!

CyberNB Inc. has launched a secure online portal to process all of the required controls to achieve Level 1 of CMMC. The portal will detail what is required to be CMMC compliant, as well as what evidence is needed to demonstrate adherence to the certification standard.

CyberNB's CMMC portal will provide access to the online toolsets needed to process the gaps for certification, ensuring you can maintain the U.S. DoD contracts you hold now and bid on future contract opportunities, all at a fraction of the cost of a CMMC gap assessment by a third party.

Third parties will charge thousands of dollars for a CMMC gap assessment. At a flat rate of \$350, CyberNB's portal enables your organization to save money and come in with a lower, more competitive DoD bid as a result.

100%

of new U.S. DoD contractors require suppliers to be CMMC compliant

85%

of U.S. DoD contracts will require CMMC Level 1 compliance

\$350

CAD fee to get started with CyberNB's CMMC portal

If you currently hold a U.S. Department of Defense contract or are looking to bid on U.S. DoD contracts, you can prepare for this certification now!

Visit cybernb.ca/Trust-and-Compliance and select CMMC to get started.

CMMC LEVEL 1: Performed, Basic Cyber Hygiene

Level 1 of Cybersecurity Maturity Model Certification (CMMC) will cover 17 select practices for basic safeguarding of U.S. DoD Federal Contract Information.

The capability domains under CMMC Level 1 are:

- ✓ Access Control (AC)
- ✓ Identification and Authentication (IA)
- ✓ Media Protection (MP)
- ✓ Physical Protection (PE)
- ✓ System and Communications Protections (SC)
- ✓ System and Information Integrity (SI)

CyberNB can help you achieve readiness by closing all gaps between your current level of cyber hygiene and full CMMC certification!

You are not alone

Processing the required CMMC certification controls can seem daunting, but CyberNB is here to help. With our secure online portal, you will be able to clearly see what is required and what gaps need to be closed to be compliant.

Complying with CMMC Level 1 is not as hard as you think. You are likely already practicing many of the 17 select practices for basic safeguarding of U.S. DoD Federal Contract Information, and if you have gaps, we are here to help you close them.

Need more assistance?

We have a list of trusted Managed Service Providers (MSPs) that can help close the gaps for you. These MSPs have extensive experience guiding organizations through Canadian and International cybersecurity certifications, and are ready and waiting to help you today.

Note that MSPs charge a submission review fee that is separate from the \$350 CyberNB portal access fee.

Contact **CyberNB** at info@cybernb.ca to get connected with the Managed Service Provider of your choice.

How it Works

1. Register to the secure online portal [here](#)
2. Complete the Compliance Roadmap
3. (Optional) Submit the Compliance Roadmap for review by a Managed Service Provider (MSP)

The MSP of your choice will review your submission and identify the gaps to close OR inform you that you are ready for CMMC Level 1 review.

Once your Compliance Roadmap is ready for review, contact a C3PAO on the CMMC-AB Marketplace to complete certification: cmmcab.org/marketplace

Visit cybernb.ca/trust&compliance and select CMMC to get started today
